Description

The *Handball Scoreboard server* is a device which can bring live scores of a match to a screen for spectator viewing. The scores are updated from any handheld Wi-Fi device with the accompanying Handball Scoreboard app which is free for both iOS and Android devices via the Apple Store and Google Play Store.

While no live game is taking place the Scoreboard defaults to a digital signage mode which can be used to display notices, images or video ads providing a revenue stream through advertising.

The app is designed to be used by the referee to replace traditional paper scoring methods but may be used instead by a second match official or designated venue scoreboard operator.

Current Price: €150

Price includes:

- 1 x Handball Scoreboard unit
- HDMI cable
- Power Cable
- Post and Packing to any address in Ireland
- Instruction manual
- Free software updates for 1 year
- Telephone and Email support

The scoreboard connects to any external TV or screen with a HDMI input. It comes with a built-in wifi hotspot so no internet connection or separate router is required.

If you have any further questions or queries please let me know.
