Summary

The *Handball Scoreboard server (Scoreboard)* is a device which can bring live scores of a match to a screen for spectator viewing. The scores are updated from any handheld Wi-Fi device with the accompanying Handball Scoreboard app which is free for both iOS and Android devices via the Apple Store and Google Play Store. While no live game is taking place the Scoreboard defaults to a digital signage mode which can be used to display notices or ads providing a revenue stream through advertising. The app is designed to be used by the ref to replace traditional paper scoring methods but may be used instead by a second match official or designated venue scoreboard operator.

Scenarios of use

The *Handball Scoreboard* on its own can add value to a complex by displaying live match statistics to the supporters and players, and offers a revenue stream to the complex itself. This usage can be expanded from a single screen use to:

- a screen for each court
- a screen in the lobby or communal area showing the stats of live matches / recent results / upcoming fixtures
- a screen that just shows the sponsors ads
- a screen that displays matches from two courts at once

Live Match - Single Screen

This is the default mode and suitable for one court and screen in a complex. Any match data received by an app will be displayed on the screen. The screen switches to digital signage mode if there is no recent live data received.

MENS A SEMI FINAL		2 x Games to 15, Tiebreaker to 11 15-4 14-15	
 GALWAY		1	12
JOE O'CONNELL			
TOMMY DUGGAN			
 MAYO		1	5
WILLE JOE PADDEN			
LIAM MCHALE			

Timed Match - Single Screen

If the game being shown on screen is a timed match then the remaining time is shown as it counts down.

6:56		Timed Game 15 mins or first to 21	
	GALWAY	12	
	JOE O'CONNELL		
	MAYO	5	
	WILLE JOE PADDEN		

Splitscreen - Two adjacent courts sharing one screen

When two matches are being tracked on adjacent courts simultaneously, the display operates in split screen mode showing the two match stats side by side. If only one game is being tracked the display will switch automatically back to full screen single court view.
